PURE ECO

We take responsibility – with firm conviction

At Sortimo we gladly fulfill the international ambient protection regulations by using the world's resources responsibly and responsible corporate management.

Our new Globelyst C in-vehicle equipment which is made of fiber composite materials and lightweight construction, will reduce CO₂ emissions and you will use less petrol in your vehicle. **It is sustainable with conviction.**

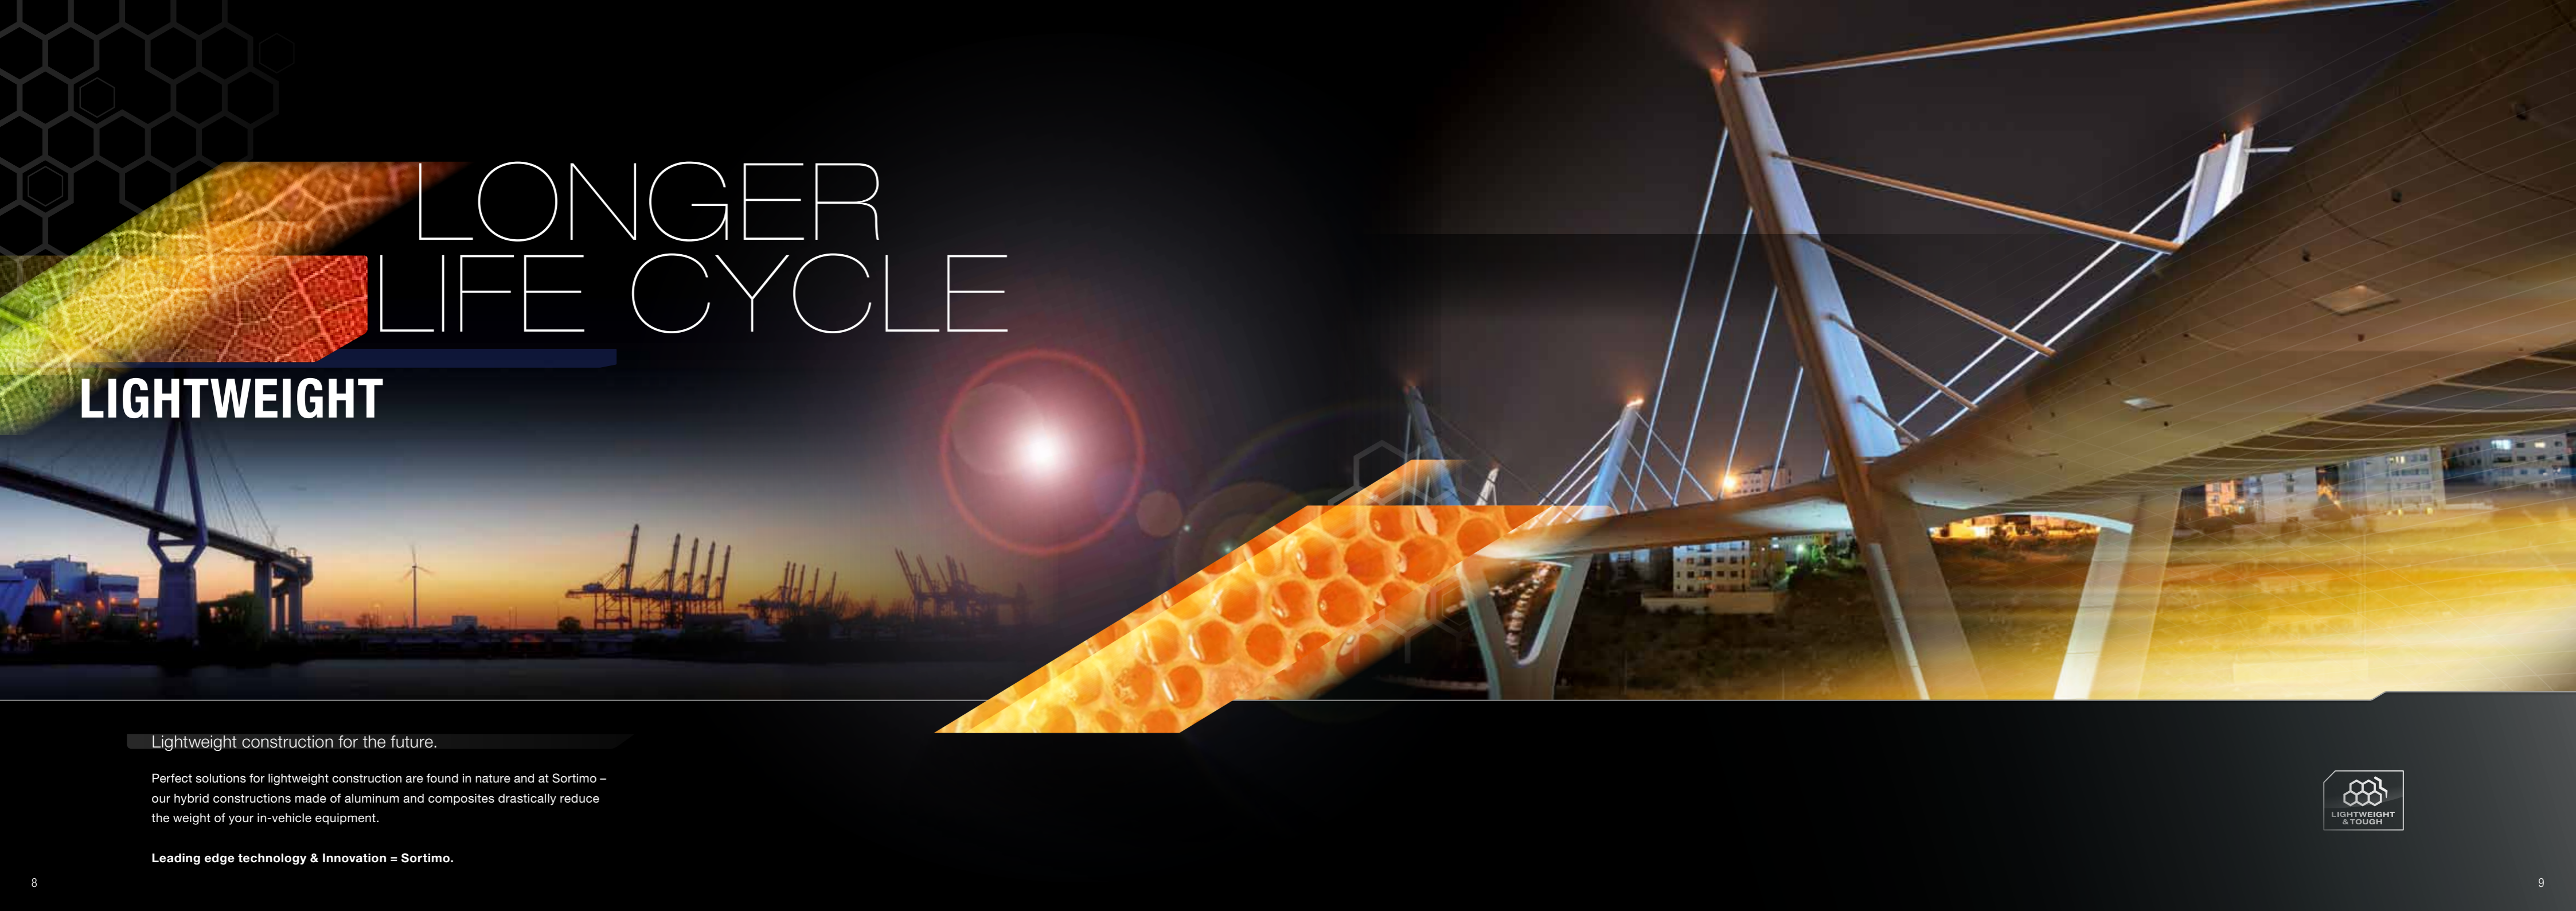

BE UNIQUE

In touch with the future.

Using composite materials instead of traditionally heavy materials means less CO₂ emissions during the manufacture, a long service life, high stability and rigidity.

In-vehicle equipment made of composites is highly resistant against UV rays, weather conditions, corrosion and rotting, and is resistant to almost all chemicals. **Manufactured with the future in mind.**

LONGER LIFE CYCLE

LIGHTWEIGHT

Lightweight construction for the future.

Perfect solutions for lightweight construction are found in nature and at Sortimo – our hybrid constructions made of aluminum and composites drastically reduce the weight of your in-vehicle equipment.

Leading edge technology & Innovation = Sortimo.

NO LIMIT

As versatile as their requirements.

Irrespective of how often your requirements change – in-vehicle equipment from Sortimo will fulfill these needs at every level. There are no limits to your creativity – you go ahead and optimize your place of work – completely individual, totally **Globelyst C.**

Thanks to our proven Sortimo-assembly system and the total compatibility of all different components, Sortimo offers you a great variety of combination possibilities. **You tell us – we make it real.**

EFFICIENCY ON THE ROAD

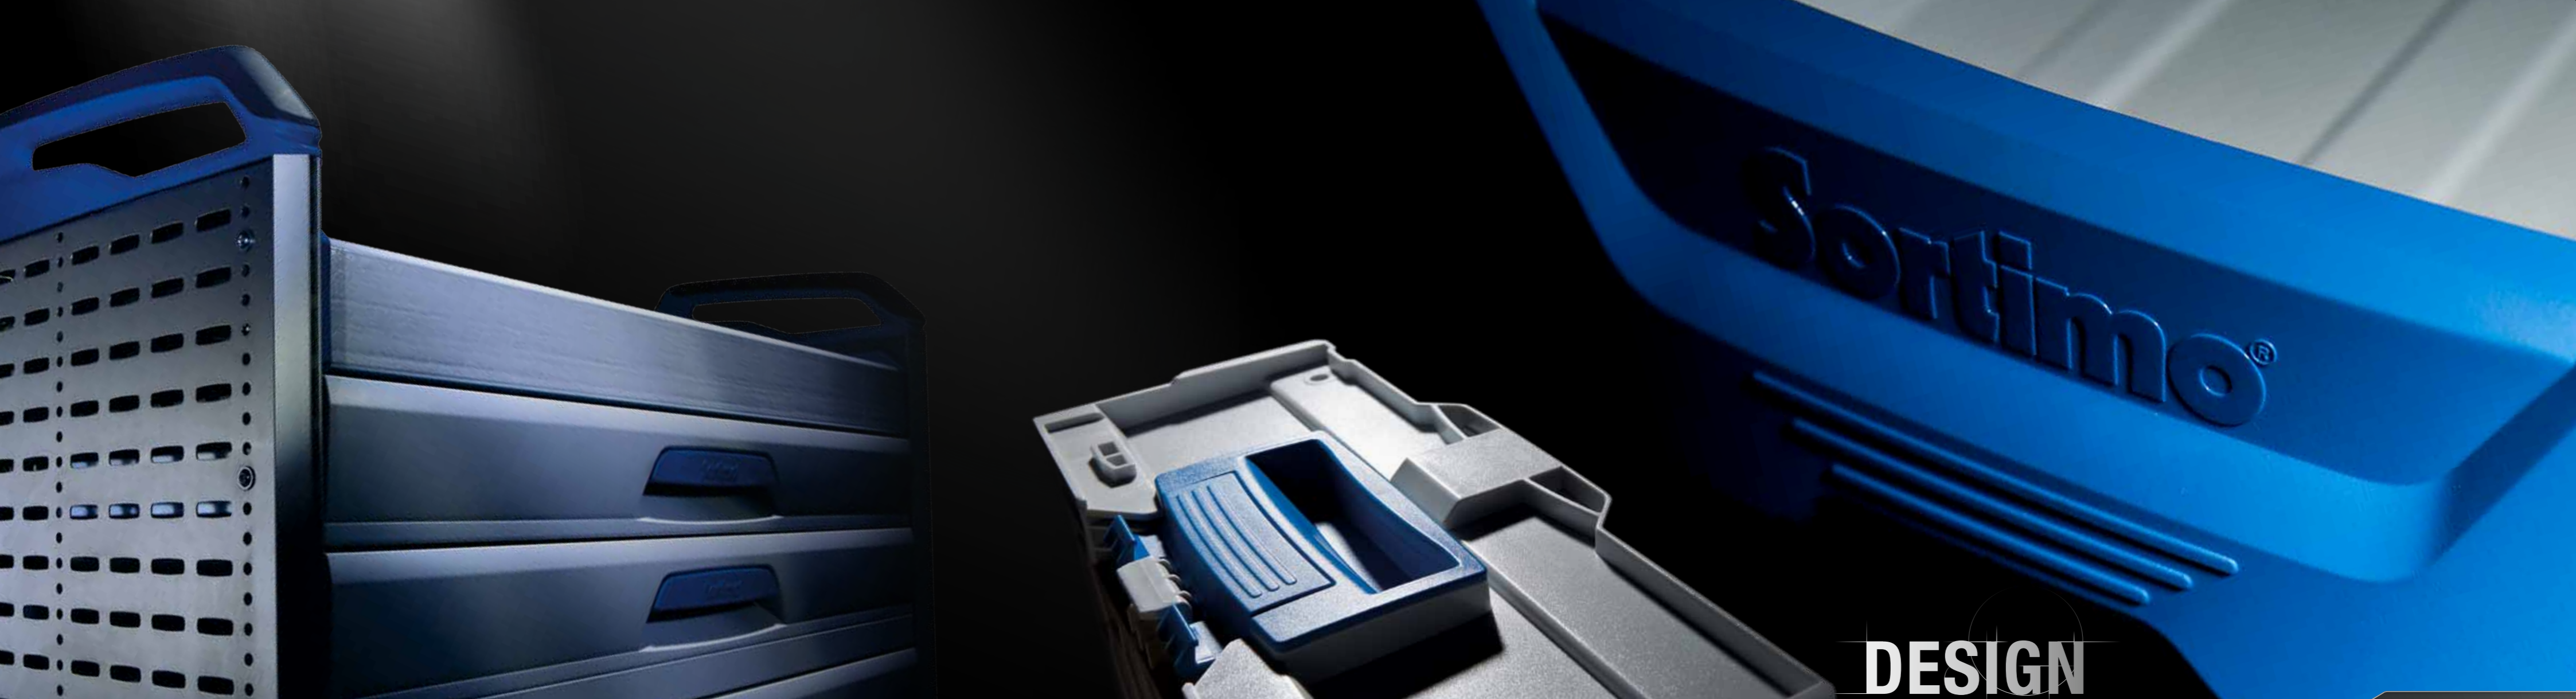

...while saving on petrol.

While others still fill up, you are on the way to your next customer. Uncompromising lightweight construction reduces petrol costs while improving the climate balance.

With Sortimo equipment you are one step ahead of the competition.

Innovative, dynamic and uncomplicated

The innovative and unique design are outstanding features of the Globelyst C system. The equipment is attractively striking and clearly stands out from other system fittings.

The light colors of the equipment inside the vehicle make the space look

bigger, more inviting and perfectly match the lightweight construction. All operating elements can be handled intuitively, even with working gloves. Easy to understand handling means added value.

Ergonomics – perfect function in motion.

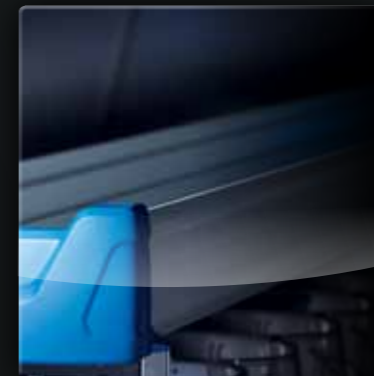

DESIGN

GLOBELYST C

MORE THAN A VISION

Sortimo – the industry standard
Quality and compatibility throughout the entire product range – rigorously tested and guaranteed by our own high standards.

The long components tray with the new cover flap is made from lightweight composite fibres and can be loaded even more easily.

ProSafe
The integrated ProSafe lashing system is standard vehicle equipment.

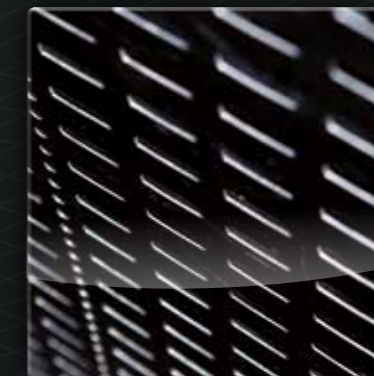

Product functionality
This is the same for our entire product range – every single Sortimo product is designed for uncompromising functionality and good ergonomics.

Easy to transport
Our extremely lightweight products ensure comfortable transport.

Easy to secure
Locking individual components quickly and “crash-safe” into place is made possible by the Sortimo system.

The perforated aluminium panel
The aluminium panels are mounting plates for countless options from the Sortimo accessories range.

Multifunctional storage tray
One of the many useful additions from the Sortimo accessories range.

SORTIMO INNOVATIONS LET YOU BE AHEAD OF YOUR TIME.
